

OUR BEST DEFENSE

We've heard the saying, "the price of freedom means eternal vigilance," and taking a preemptive strike regarding homeland security is one critical step in this process. Protecting sensitive areas and equipment with wire mesh partitions from Acorn Wire and Iron Works adds yet another wall of defense to secure environments. Crafted of 6-gauge steel, Acorn's Homeland Security Cages provide even greater security in these demanding locations than their regular-duty cages.

ACORN Wire Mesh Partitions

mail sorting facilities

bonded warehouses

healthcare & medical facilities

nuclear facilities

government buildings

financial institutions

airport security

police stations & court houses

Features:

- 6-gauge steel wire construction woven into 2" diamond mesh that is securely clinched into 1½" x ¾" channel frames.
- All joints are mortised and tenoned for added strength.
- 1½" x ¾" center reinforcing bar is channel-tenoned to side frames for greater security.
- Adjustable floor sockets enable level installation and secure anchorage for stability.
- Formed, "turned-in-toe" channel uprights prevent telescoping and assure permanent alignment.
- Doors incorporate sturdy, mortise-type cylinder locks that are accessible by key from the outside and by recessed knob on the inside.
- All hardware is provided for installation.

Options:

- Components are available in 7' to 24' heights in 12" increments and can be configured in a myriad of ways.
- Standard panels, sliding door sections, service window panels, hinged door sections, filler panels, corners and intersections, and flat bar posts are offered.
- Custom configurations are available.
- Top capping bar can be anchored to walls and/or ceilings.
- Electrostatic-sprayed enamel finishes include green, gray, black or galvanized.
